Django Assignment II

1. Create a full-featured Django Application with the following features:
    -   User Authentication System. (Using Email)
    -   User Profile CRUD (Including Profile Image)
    -   Users are allowed to write blogs.
    -   Users can CRUD their own blogs but can only read other users' blogs.
    -   Add the functionality to verify your account from the mail. (while user registration)

        Try to implement all the views logics from class-based views. Also, you can add cache wherever it might be appropriate.
